

CHAPTER V

CONCLUSION AND ECOMMENDATION

This chapter presented to point out some essential finding, that have been elaborated the previous discussion to finding of the study, some conclusions and suggestion are summarized in below.

5.1 Conclusion

The result of this development was Interactive CD. The researcher had passed some steps in developing the English reading material. The need analysis result showed, there were some targets of students learning need. First the student enjoyed learning English. Second the students could understand and memorize the vocabularies by using audio and picture. Next step was expert validation. There were four components which was used for evaluation; attractiveness, concept, content and originality. The result showed there were some part should be revised such as adding audio, background picture and also for grammatical error.

Then, the researcher tried out the product to students of the 7th grade of Mts. Muhammadiyah 9 Wotan. The result showed that all students get excited and interesting with the products, In terms of appearance, content and uniqueness. The students also did not get stuck in operating the product. In addition the researcher had asked to the students one by one about this product. Most of them were happy and interesting when tried this media. That would be new thing for them in learning English. In revision, the researcher still had to revise the product more so this product could be used the 7th grade of Mts. Muhammadiyah 9 Wotan. After

having revision, the final product has been ready to be applied. In conclusion, learning English reading using Autoplay could be applied on the 7th grade of Mts. Muhammadiyah 9 Wotan.

5.2 Recommendations

In curriculum 2013 the governor preferred teaching using IT, also preferred media and learning approach which could build students' independent. Autoplay could be one of media that could dig student curiosity and their interesting. Students also could run the Autoplay individually without teacher's explanation.

From the result above, the researcher might give some recommendation to teacher, and the next researcher that this product could be applied especially for the 7th grade of junior high school. It still could be used to other level of young learners who are interested. This product is quite easy in operating, because this product is in the form of video CD. For teacher, perhaps from this product could help teacher in increasing their knowledge in using media computer, and this product could help students in learning English.

For the next researcher, this product was suitable with curriculum 2013 which mixed all skills (listening, speaking, reading and writing) in learning, even though in different subject and variable, perhaps this research could give inspiration in developing Autoplay more and the materials itself. Autoplay can be used in another research design such as CAR (Classroom Action Research) or Experiment research.
