**ABSTRACT**

Thesis results were tested and found to pass from the trial and it is approved by a team of examiners , then performed the process of gathering thesis document in hardcopy and softcopy . During this time in the department of Information Engineering , Faculty of Engineering , University of Muhammadiyah Gresik there are some students who do not collect the thesis document , due to the limitations of activity . The nature of the document is very important to do the data collection and the archives graduation or thesis papers owned by the department of Information Engineering , Faculty of Engineering , University of Muhammadiyah Gresik .

Completion and for the collection of such documents made " Thesis Document Information System Based on Web " to facilitate students who will collect a thesis softcopy documents to be uploaded by the student through the system for easy storing thesis document archive . In addition the system is also used to find out who has been collecting documents thesis . The method used in the manufacture of the thesis using the SDLC ( System Development Live Cycle ) which focuses on the methods used and technicians . Stages to build this system is to analyze the needs of the system , then conducted design programs , after designing a program to design a system with coding using php programming language , then implementation and test this thesis document information systems . This system is required to complete the form of software , Edit Plus , Xampp 1.6.7 , SQLyog , php , MySQL , Omnigraffle pro , DB desaigner , and Mozilla Firefox . For specifications of the hardware used is AMD Brazos E - 350 1.6GHz , 320GB hard drive , 2GB RAM

The results obtained in the manufacture of this thesis document information system is Kaprodi and lecturers student can view and record the thesis that has been collecting documents softcopy form . For the student will receive the results in the form of collecting documents attestation sheet containing the minutes of the hearing , receipt paper and cd checklist .

Keywords : Information Systems , Thesis , Thesis , Thesis Document , Xampp , Power Designer , SQL Yog , PHP 5.2.6, Dokumen .
