

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter is devoted to draw some conclusion and suggestions based on the research findings and discussion presented in the previous chapter.

1.1 Conclusion

Based on the result of the study, the researcher agrees that the theory of mind mapping method can be applied in eleventh grade levels. It can be applied for descriptive text of speaking. Here, the researcher experimented mind mapping method in speaking idea of descriptive text and the result showed that the teaching speaking by using mind mapping method has a positive effect in speaking idea of descriptive text than by using Traditional method.

It can be seen from the result of pre-test and post-test that there is enough evidence to conclude that mind mapping strategy can be apply in speaking idea of descriptive text. The implementation of Mind mapping strategy can make the students enjoy and enthusiastic so they are confident to speak from their idea and easy to develop their idea when the students tell the story orally. Additionally, Mind mapping strategy makes the students more active when they to speak by their idea. This method also helps the students to focus on the topic.

5.2 Suggestion

Based on the finding and the conclusion of this study, there are some suggestions that provide for the teachers, students and future researchers who want to implement mind mapping strategy. The suggestions are follows:

5.2.1 Suggestion for English Teacher

The researcher suggests for the English teacher can apply Mind mappingstrategy in teaching speaking as an alternative method to avoid monotonous activities in teaching learning speaking process and to make the students confidence in their idea of speaking. The teacher should provide an interesting material and also provide another media then create the teaching learning speaking more enjoyable. Then, the teacher also should guide their students to be active in learning speaking idea in order to they are interested and motivated to join in speaking class.

5.2.2. Suggestion for Students

The students can practice their idea of speaking by using mind mappingstrategy. They can use several methods of mind mappingstrategy which are telling the story well with their own ideas. In learning speaking by using mind mapping method, the students should have enough knowledge about the materials. So, they also should be active and creative to speak up with their own idea.

5.2.3 Suggestion for Future Researcher

The researcher suggests for further researchers to conduct mind mappingstrategy because it is good in teaching learning process. They can implement mind mappingstrategy in same level in Senior High School. They are also able to provide other texts and media that enjoyed and easy for the students to speak up with their own idea.
