CHAPTER V

CONCLUSION AND RECOMMENDATION

In this chapter, the researcher presented the conclusion and recommendation on the use of speed reading media as the reading material in this study.

5.1 Conclusion

Developing material is the important way in the process of learning in order to increase students knowledge, ability and motivation. In developing material, the important thing that should be done is mastering well about what kind of material that will be developed, what is the students expectation in the process of learning. There are many things in developing speed reading. In this case, there are some texts with different sum of words and timer so it can help students to train speed reading. Beside the reading text, the speed reading product also adds with the multiple choice question in order to helping students understanding a text.

The researcher chooses two topics of short story, there are famous people and sport. The background picture from each text of short story are different, depends on the short story. For example, when they click button "text 1" with short story about Benjamin Franklin, the background will be related with Benjamin Franklin. Most of them are interested and fun with this media to train speed reading and they will use it to train their speed reading.

5.2 Recommendation

From the result above, the researcher gave some recommendations to use this product not only for first semester students of English department at University Muhammadiyah of Gresik morning class but also for other students in the same level who want to train speed reading.

The researcher also suggested other researchers to use this product as their reference in developing the material especially in speed reading. Other researcher can develop this speed reading product in other kinds of text, level and difficulty also with different application in the process of developing, such as; using Dreamweaver, Autorun or other application in the process of creating and arranging a design of the product in order to make better design than this product.

Then, this speed reading media is useful for students to train their speed in reading without leaving their understanding; it can motivate students in the process of learning because it has good appearance. Moreover, the design can make students interest.
