

CHAPTER V

CONCLUSION & RECOMMENDATION

5.1 Conclusion

Based on the observation of discussion methods' implementation, the researcher will summarize the important points related to the result of following research study, as follow:

1. The steps of discussion methods' implementation in teaching news item text are:

- a. presenting the case
- b. guiding students for making the discussion group
- c. discussion activity
- d. reporting the result of discussions
- e. giving feedback related to the result
- f. writing down and submitting the result of discussion.

2. In practice, the implementation of discussion method for teaching news item text requires more time and preparation both in terms of material procurement or implementation of the activity itself.

5.2 Recommendation

From the conclusion above, the researcher will give some recommendation for other researchers. Research related to the implementation of discussion method to improve others language skill is also needed. Moreover, conducting research on teachers' thinking about discussion is also needed. It is because of the

impact teachers have on instruction and students. Moreover, the teacher plays a powerful role in determining what, and how, the subject matter is taught. Understanding teachers 'thinking about the discussion is a needed step in discussion of research if we assume that teachers' thoughts underlie their classroom action.
