

ABSTRACT

Sa'diyah, Iklimatus 2016. *Developing Reading Test Focuses on Narrative Text Using CALL (Longtion Autorun Application) at the Eight Grade of MTs. Al-Karimi 1 Tebuwung Dukun Gresik*. The Sarjana's Thesis, English Education Department, Faculty of Teacher Training and Education, Muhammadiyah University of Gresik. Advisors: (I) Dr. Yudhi Arifani, M.Pd (II) Rohmy Husniah, M.Pd

Key Words: Reading Test, Narrative Text, CALL

Media is able to support in teaching and learning process. The eight grade of A class of MTs. Al karimi 1 Tebuwung Dukun Gresik has facilitated with Liquid Crystal Display (LCD). For using the media, the teacher has developed speaking, listening, and writing test. For reading test is still used manually test, it means that the teacher used a paper for test. Therefore, the writer is going to develop reading test with a new media as a mean to give a good stimulus for the students in order to be able to work some reading questions fun and easy. Besides, the students are able to do the test at home practically because they can save the test. Longtion Autorun Application is one of CALL media, but it is more complete because hot potatoes, power point, video and others are able to be included in this application. Therefore, this research develops reading test that focuses on narrative text using Longtion Autorun Application at the eight grade of A class of MTs. Al karimi 1 Tebuwung Dukun Gresik. Based on the problems that the researcher finds, the problem is *“how to develop reading test focuses on narrative text using CALL (Longtion Autorun Application) at the 8th grade at MTs. Al-karimi 1 Tebuwung Dukun Gresik*.

The design of this research is Research and Development. The object is the eight grade of the second semester of A class of MTs. Al-Karimi 1 Tebuwung Dukun Gresik. They are 28 students which consist of 20 females and 8 males. The researcher developed reading test with 40 questions of multiple choice items.

Based on the feedback from the teacher of MTs. Al-Karimi 1 Tebuwung Dukun Gresik, the time allocation has to be changed into 90 minutes. The result of pre-testing is good because the reliability statistic is 0,937, and all of items are valid, but there are some revisions for multiple choice items in number 1, 8, 26, 37, and 38. Those numbers are revised because the result is more than 0.8 point, so those numbers are easy for students. The researcher enters the test into Longtion Autorun Application. Then, the result of the minimum score is 45,0 and the maximum score is 97,5. The result of the students' perception toward the product of reading test by using Longtion Autorun Application is enjoyable for them, and also eases them in doing the test. Therefore, it is good because the students like the product although a few students dislike it. Besides, the researcher suggests to the next researchers to use this study as their references because this study can inspire the next researchers to develop the test into another way, so the next researchers can develop the test with another skill, subject, and application.
