

## CHAPTER V

### CONCLUSION AND SUGGESTION

This is the last chapter in this study. It contains the conclusion of this study and elaborates with the suggestion that relates with the correlation between SDL and students' achievement through PjBL.

#### **5.1 Conclusion**

The researcher concludes this thesis in those statements bellow.

1. The Spearman's rho coefficient value is 0,548 which can be concluded that that there is positive and strong correlation between SDL and students 'achievement of 6<sup>th</sup> semester of English Education Department at Muhammadiyah University of Gresik. It means that SDL and students' achievement have contribution and roles for each other to make better achievement.
2. The significant correlation value in this study is 0,002 between SDL and students' achievement of 6<sup>th</sup> semester of English Education Department at Muhammadiyah University of Gresik. It means that the correlation between SDL and students' achievement is important and real. So SDL can be used for one of indicator that affects students' achievement.

#### **5.2 Suggestion**

The researcher also give 4 suggestions, those are:

1. Since SDL and students' achievement are significantly and positively correlated which imply the both of them are important and support each

other, SDL also can be the best activities such as PjBL in classroom to increase both SDL and students' achievement.

2. Since there is strong correlation between SDL and students' achievement which implies that both variables are close related. So enhance SDL is important for getting better achievement.
3. As we know that as the candidates of teacher, they should have SDL because it is very useful for them to be a good teacher in this era. The candidates of teacher also need to have SDL to help them when they face the growth of this era.
4. SDL is not only needed by the candidates of teacher, it is also needed for the students who want to get better performance and achievement.
