

## CHAPTER V

### CONCLUSION AND RECOMMENDATION

This chapter presents conclusion and recommendation. The conclusion is the results of this research which are discussed in the previous chapter and the recommendation is related to the development of English vocabulary material for the eighth grade students at MTSN Gresik.

#### 5.1 Conclusion

The objective of the test is to develop vocabulary test by longtion autorun software. The researcher develops the vocabulary test by learning more about syllabus from the school, here the researcher had taken one period for second semester. The content of syllabus for vocabulary in reading skill, it has four topics to be applied in vocabulary test, they are food, time, place, and transportation. The number of multiple test items is 16, while the number of matching test is 14 so the total items are 30 items

The reason for using multiple choice and using matching test is taken from the result of students' answer from the questionnaire. And another reason, the multiple choice and matching test format is suitable with the characteristic of the test objectives.

The result of the first test shows that many items are not good. The poor items are item number for multiple choice are 2, 3, 6, 7, 9,10,12,13,14 and 16 and matching are 17, 20, 21, 22, 23, 25, 28, 2. Therefore, these items should be revised. After that, the researcher give the second try out, the result are 8, 9, 10, 11, 20, 24, 27, 29 which is The poor items.

Based on the reliability estimation, The result of first try out, showed 0.44 that meant the vocabulary test was the low reliable. And The result of second try out, showed 0.64 that meant the vocabulary test was high reliable.

The result of two expert validation. The first expert of English teacher said that the test has appropriated with the syllabus and curriculum for 5<sup>th</sup> grade students in this school and The second expert validation of the lecture in university of muhammadiyah gresik said that the test has several errors such as misspelling, grammatical, less picture, and less reading text. The researcher agrees to make the test better and finally the researcher can finish the revision.

Then, the researcher gives the questioner to the students. All of them said that they were very happy, felt easy to understand the test, and could try this media. That would be new thing for them in English test. One of them said that the teacher has not taught yet using such kind of media and she can learn again using similiar media.

## **5.2 Recommendation**

In introducing vocabularies, the teacher preferred to make list of some English words on the white board and invited the students to read together. The problem was students often forgot vocabularies which they got vocabulary test. When the teacher asked more vocabularies, students had to think hard to memorize those vocabularies.

From the result above the researcher gave a recommendation to the teacher and the students that this product could be applied especially for the fifth grade of elementary school.

For the teacher, this product could help to provide a better test and new media for vocabulary test in elementary school. It could make the students motivated in English test. It also could give inspiration for the teacher to create new interesting test in test process.

Then, for the students, this product could be fun media whereas hopefully they would not be bored and improve their motivation in English test. This product also could be a good media in test of learning for the student during vocabulary test in class. So, the student could enjoy the test not only to use paper test but other sources such as electronics test.

For readers, the result of this research could motivate them to develop it into another media. It also contributed for those people who relate to test process.

The last, for next researcher could give the information related to develop an English vocabulary test using Longtion program in vocabulary test. So, it can be the previous study for the next researcher who wants to conduct a research and development in vocabulary area using Longtion program program. This product may also be taken into an action research to find out the effects of implementing this product in vocabulary test. For other researcher, it also could inspire them in developing test more into other way.
