ABSTRAKSI

Penelitian ini bertujuan melakukan pengujian pengaruh *current ratio*, *total assets turnover*, dan *debt equity ratio* terhadap *return on equity* pada perusahaan manufaktur sektor kimia dan industri di bursa efek indonesia periode 2009-2013. Populasi dalam penelitian adalah 10 perusahaan yang masuk pada sektor kimia dan industri periode 2009-2013. Penelitian sampel ditentukan dengan metode sampel jenuh dan diperoleh data sebanyak 50 perusahaan selama periode pengamatan 5 tahun. Teknik analisis yang digunakan adalah analisis regresi linier berganda dan uji hipotesis menggunakan uji t secara parsial dan uji f secara simultan.

Hasil penelitian menunjukkan bahwa *current ratio*, *total assets turnover*, dan *debt equity ratio* berpengaruh negatif secara parsial terhadap *return on equity* pada perusahaan sektor kimia dan industri periode 2009-2013. Sedangkan secara simultan *current ratio*, *total assets turnover*, dan *debt equity ratio* berpengaruh terhadap *return on equity* pada perusahaan sektor kimia dan industri periode 2009-2013.

Kata kunci: *current ratio*, *total assets turnover*, *debt equity ratio*, *return on equity*,

ABSTRACT

This study aimed to test the effect of the current ratio, total asset turnover, and the debt equity ratio of the return on equity in manufacturing companies in the industrial chemical sector and the stock exchange Indonesia 2009-2013. The population in this research are 10 companies included in the chemical sector and industry 2009-2013. The research sample was determined by the method of saturated samples and the data obtained by 50 companies during the observation period of 5 years. The analysis technique used is multiple linear regression analysis and hypothesis testing using t test and f test partially simultaneously.

The results showed that the current ratio, total asset turnover, and the debt equity ratio partially negative effect on return on equity in the enterprise sector and the chemical industry 2009-2013 period. While simultaneously the current ratio, total asset turnover, and the debt equity ratio affect the return on equity in the enterprise sector and the chemical industry 2009-2013 period.

Key words: current ratio, total asset turnover, debt equity ratio, return on equity.
