

PROFIL PENGENDALIAN PERSEDIAAN OBAT *FAST MOVING* PADA PELAYANAN SWAMEDIKASI DI APOTEK KIMIA FARMA IBNU SINA GRESIK

YUYUN TRI ASTUTI

ABSTRAK

Pengendalian persediaan adalah kegiatan untuk mempertahankan jenis dan jumlah persediaan sesuai kebutuhan pelayanan melalui pengaturan sistem pengadaan, penyimpanan dan pengeluaran. Pengendalian persediaan bermanfaat untuk dapat memberikan jenis dan jumlah obat yang tepat sesuai kebutuhan pasien, serta menghindari terjadinya kelebihan dan kekosongan stok obat, sehingga penggunaan obat dapat dilakukan secara baik dan benar. Penelitian ini bertujuan untuk mengetahui pengendalian persediaan obat *fast moving* pada pelayanan swamedikasi di Apotek Kimia Farma Ibnu Sina yang dilakukan pada bulan Mei 2019. Metode penelitian yang dilakukan yaitu deskriptif kualitatif melalui metode observasi dan wawancara. Pengendalian persediaan obat *fast moving* dalam Apotek Kimia Farma Ibnu Sina Gresik sebagian besar telah sesuai dengan Peraturan Menteri Kesehatan Republik Indonesia Nomor 73 Tahun 2016 Tentang Standar Pelayanan Kefarmasian di Apotek, kecuali pengadaan, penerimaan, dan penyimpanan obat. Selain itu, dari pengamatan profil pelayanan obat *fast moving* periode bulan Mei 2019 didapatkan bahwa Sangobion obat yang paling sering dilayani dengan presentase 25.91 %.

ABSTRACT

Inventory control is an activity to maintain the type and amount of inventory according to service requirements through the procurement, storage and expenditure system. Inventory control is useful to be able to provide the right type and amount of drugs according to the needs of patients, as well as to avoid the occurrence of excess and emptiness of drug stocks, so that the use of drugs can be done properly and correctly. This study aims to determine the control of fast moving drug inventory in self-medication services at the Pharmacy Farma Ibnu Sina Pharmacy conducted in May 2019. The research method used is descriptive qualitative through observation and interview methods. The control of fast moving drug inventory in the Pharmacy Farma Ibnu Sina Gresik Pharmacy is largely in accordance with the Regulation of the Minister of Health of the Republic of Indonesia Number 73 Year 2016 Regarding Pharmaceutical Service Standards in Pharmacies, except the procurement, receipt and storage of drugs. In addition, from observing the profile of fast moving drug services in the May 2019 period it was found that Sangobion was the most frequently served drug with a percentage of 25.91%.
