ABSTRACT

This study aims to determine the effect of the current ratio, debt to equity ratio, and total asset turnover on return on assets in property and real estate sector companies in the Indonesia Stock Exchange in 2015-2017. The independent variables in this study are the current ratio, debt to equity ratio, and total asset turnover. The dependent variable in this study is return on assets. This research is a type of quantitative research. The population of this research is property and real estate companies that have consistent profits on the Indonesia Stock Exchange in 2015-2017. By using panel data as a sample in this study. This data is in the form of audited and published annual financial statements. The analysis technique used in this study is multiple linear regression analysis with the help of the SPSS program. Based on the results of data analysis shows that the current ratio, debt to equity ratio, and total asset turnover have a significant effect on return on assets.

Keywords: Current Ratio (CR), Debt to Equity Ratio (DER), Total Asset Turnover (TATO), Return On Asset (ROA).
