

CHAPTER V

CONCLUSION AND RECOMMENDATION

The last chapter of the study presents the conclusion and recommendation. This chapter presents some conclusions as well as some recommendations about the result of the study in the previous chapter and the recommendation related to the development of interactive learning media in teaching speaking for students at the eighth grade of MTs. Al-Muniroh.

5.1 Conclusion

According to the result of the study on the previous chapter, the researcher drew conclusions that can be summarized as follows.

5.1.1 The Learning Needs and Target Needs

According to the research finding, the needs analysis is divided into two aspects which are target needs and learning needs. Those aspects are explained as follows:

- The student need topics in the learning materials were about Short Functional text (Advertisement), Narrative text, Recount text and Descriptive text.
- The students were given some activities in the form of individual, pair, and group activity.
- The use of interactive learning media was given in each of individual, pair, and group activities.

5.1.2 The Appropriate Speaking Material for Students

The interactive learning media consists of 4 chapters which has the components: title, materials, exercises activity 1, activity 2, activity 3, and activity 4. The title of every chapter has a generic structure and definition. The material in each chapter is different. Chapter 1 is about "Advertisement", chapter 2 is "Narrative text", chapter 3 is "Recount text" and the last chapter is "Descriptive text". For the first activity is for the students to do it individually. The second activity is in the form of pictures and the students do it in pair. The third activity is in the form of video for students group exercise. The last activity is for students to create their own story or text based on the topic given then perform it orally in the group and class.

5.2 Recommendation

The purpose of this study is to develop Interactive Learning Media in teaching speaking for students at the eighth grade of MTs. Al-Muniroh. Based on the result of study, there are some suggestions purposed for the English teachers and the next researcher. The suggestions can be explained as follows:

1. For the English teachers, they should be creative to develop the learning materials with technology to make an effective and interesting teaching and learning media, this product can help to provide a better test and new media for speaking material and give motivation to make a better interesting learning media to teach for Junior High School students.
2. For the students, the product is fun and interesting for them and hopefully they will not get bored during learning process and can build a motivation for them to learn English more especially in speaking because of the interesting learning media.
3. For the next researcher, in developing interactive learning media, the other researcher should consider the content and design of the media. The content should be suitable and appropriate with students' need. The design should be interesting, thus the students can be motivated in English teaching learning process because the media is using Longtion AutoRun program and this media is in the form of computer program not English book only.
