

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the result of performance based assessment and multiple option assessment of English, the researcher will summarize the importance point related to the following research study.

Referring to the feedback from the English teacher in Muhammadiyah 8 Senior High School of Cerme, there was a good result in performance based assessment of English.

Based on the research finding, it can be concluded that, the use of performance based assessment in English can develop the students' ability. It also can make the students more active in the classroom and develop their self confidence in learning English. The students looked enthusiastic in joining all activities during teaching learning process, from watching video, analyzing the content of the video, then presenting it in front of the class.

5.1 Suggestions

The researcher with all the limitations of this study has some suggestions related to the research that has been done, namely as follows

1. It should be innovated in how assessing students at school, so that students do not get bored with the task and also the assessment can measure the students' ability.
2. Assessing students by using performance based assessment can be used as an alternative and innovative assessment for students.
3. Performance based assessment could help the students in applying their ability in English.
