

CHAPTER V

CONCLUSION AND SUGGESTION

5.1 Conclusion

Based on the result of vocabulary test, the researcher will summarize the important point related to the following research study.

Based on the research finding, it can be concluded that the vocabulary mastery audiovisual media class is better than picture media class. In other words, audiovisual media can be a media which help students in mastering vocabulary. And it also could increase students' participation and motivation in learning vocabulary.

5.1 Suggestions

The researcher with all the limitations of this study has some suggestions related to the research that has been done, namely as follows

1. It should be innovated learning methods at school, so that students do not get bored with vocabulary learning by using pictures.
2. Language learning using audiovisual media can be used as an alternative and innovative learning media.
3. The audiovisual media could help teacher and students in improving the ability to pronounce English vocabulary well.

4. Other research should be conducted in Southern Thailand, especially the experimental one, to find out the difference students' vocabulary mastery through different media.
5. Other research should be conducted to analyse students' ability in using English as a foreign language in Southern Thailand.
