CHAPTER V

CONCLUSION AND SUGGESTION

The last chapter in consisting of conclusion and suggestion. Conclusion explains the general result of finding. While suggestion is purposed to the English teacher, the students, the readers and the next researcher.

5.1 Conclusion

Based on the last chapter in finding and discussion, the writer concluded that the students' perception in three parts. The first part is the students' perception in VII class in technique, method and startegy. The writer concludes that most of the students have positive perception in technique and method teaching. The technique and the method are accepted well by the students and it helps them to learn English well. but for the strategy, they have negative perception because thay find it difficult and it is not intersting.

The second part is the students' perception in VIII class in technique, method, and startegy. It is also same as the English perception in VII class but the different is they have positive in all technique, method and strategy.

The last part is the students' perception in IX class in technique, method and strategy. It is almost same as the English perception in VII class, the technique and the method are accepted well by the students and it helps them to learn English well. but for the stratgey, they have negative and positive perception because they find it difficult but they realize that it is useful for them.

5.2 Soggestion

This part is purposed to the English teacher, the students, the readers and the next researcher. For the English teacher, they can develop their technique, method and strategy, so that there will be significant progress in their students. For the students, the writer hopes this writing can build their knowledge about English teaching. the next is for the readers, the writer expects that by conducting this research, it can give contribution for the readers as their reference.

The last is for the next researcher, the writer realize that this writing is far from perfect so the writer hopes the other researcher can generate into the other researcher with different variable and subject.
