

## CHAPTER V

### CONCLUSION AND SUGGESTION

Based on the results of research and investigation in the fourth chapter, several conclusions were taken and a number of suggestions on the implementation of the use of picture media in writing descriptive paragraph on teaching and learning activities can be written as follows:

#### 5.1 Conclusion

For more details in this study will understand the writer conclude, as follows:

1. The implementation of picture media in teaching can help the students in writing a descriptive paragraph. However, not all pictures can be used. So, the teacher should be able to select the picture that corresponds to the topic of learning. Because the picture media is one of the techniques of effective learning media because it combines facts and ideas in a clear, powerful, and integrated through the disclosure of words and pictures.
2. The use of picture media in pre teaching influence on the student learning outcomes and using picture media can help the students to develop ideas, to increase the interest and motivation of the students, make students more enthusiastic and focused so that the students do not feel bored, and make the classroom a more active and live to learn much higher than before.
3. The use of picture media at the time whilst teaching to ease the burden on the students to recall the steps in writing a descriptive paragraph, namely:

determining the theme, specify the purpose, collect the materials, make a selection garlands, develop a framework and revise the writing assigned by the teacher.

4. For the post teaching, the teacher gives a test in accordance with the material being taught by teachers who use picture media. And the teacher gave the test to determine student success in writing descriptive paragraphs.

## **5.2 Suggestions**

Based on research results, there is some advice given by the author in writing descriptive paragraphs through picture media. Namely:

1. The teachers should be more interactive in teaching using picture media, so that the students can be more upbeat again in learning, particularly in the writing descriptive paragraph. The teachers should select media and materials to suit the needs and experiences of the students so that the atmosphere of the class to be fun and exciting.
2. For further research, the writer suggested that this research was preferable to research further, because the results of the research it has some benefits for learning to write, by providing a valuable modification as well as the observations that more than once to obtain research result are better yet, because it can pull in increasing the students interest and motivation in learning.
