ACKNOWLEDGMENT

The researcher would like to express her most gratitude to Allah SWT the Almighty God, for blessing and mercy so that she can accomplish her thesis.

In this paper, she would like to give the highest appreciation and gratitude to my beloved parents Hj.Sutini and M.Shobar, my beloved husband Abdul Rokhim,my baby, and my sister Nikma and Miftah for their supports, love, helps, patience, and pray so I can finish my study.

My deepest gratitude also goes to my both advisors, Dr.Khoirul Anwar, M. Pd and Candra Hadi Asmara M. Pd for their guidance, suggestion, motivation, and patience from the first time she wrote this thesis until she finished it.

My deepest gratitude also goes to all my lecturers who had taught her for almost four years in this university. My deepest gratitude also delivers to Headmaster of SMP Manbaul Ulum who gave a chance to conduct this research in the school and supported during doing my thesis.

Finally, I would like to thank all those people who have contributed all their helps.

ABSTRACT

Zainiyah, Shofrotul. *Developing A Reading Test Using Hotpotatoes Software for Junior High School in Manbaul Ulum Giri Kebomas Gresik.* A thesis submitted as partial fulfillment of the requirements for Sarjana degree of English Language Education Department, Faculty of Teacher Training and Education, University of Muhammadiyah Gresik, 2014.

Key words: Reading Test, Hotpotatoes

The development of reading test using Hotpotatoes software is needed to improve students' abilities of SMP Manbaul Ulum in Reading, because it is already common that students' motivation and ability in reading are low. While in the modern era, students are accustomed to use computer software since they are young, so that learning process must combine the rise of technology into learning process. But in fact, the reading test given by the teacher in this school is still manually written or typed in the form of paper. The development of reading test for students of SMP Manbaul Ulum was to help them increase their motivation and ability in reading. The Design of this product was research and development. The researcher applied ADDIE model which was modified by Candra Hadi Asmara to develop this study. There were need analysis, design, development, expert validation, revision, try out and final product.

After conducting research, the researcher found that the students need new variation in reading test format using computer software. The test will be completed with colorful. After being tested to students they feel interested and enthusiastic to do the test. They also feel that it is compact and easy to operate. In conducting the research, The researcher took 20 students of seventh grade of SMP Manbaul Ulum for trying out. From the trying out, the researcher improved the weaknesses of the test. After trying out the product, it showed that the test was appropriate for the students. While the researcher asked the student about the test, most of them said that they felt interested in reading English more. The researcher hopes this product could be useful for teachers to improve their student in reading. For student, it could inspire them to be more desired to read a lot.
