Article 47

Calculation of the share of energy from renewable sources

1. The gross final consumption of energy from renewable sources in each Member State shall be calculated as the sum of:

- (a) gross final consumption of electricity from renewable energy sources;
- (b) gross final consumption of energy from renewable sources for heating and cooling; and
- (c) final consumption of energy from renewable sources in transport.

Gas, electricity and hydrogen from renewable energy sources shall be considered only once in point (a), (b), or (c) of the first subparagraph, for calculating the share of gross final consumption of energy from renewable sources.

Subject to the second subparagraph of Article 17-26 (1), biofuels, ~~and~~ bioliquids ⇒ and biomass fuels ⇨ that do not fulfil the sustainability ⇨ and greenhouse gas emissions saving ⇨ criteria set out in Article 26-17(2) to ~~(6)~~ (7) shall not be taken into account.

Lampiran 5: Amandemen 307 - Proposal for a directive - Artikel 7

Amendment 307 Proposal for a directive Article 7 – paragraph 1 – subparagraph 4

Text proposed by the Commission

For the calculation of a Member State's gross final consumption of energy from renewable energy sources, the contribution from biofuels and bioliquids, as well as from biomass fuels consumed in transport, if produced from food or feed crops, shall be no more than **7% of** final consumption of energy in road and rail transport **in that Member State. This limit shall be reduced to 3,8% in 2030 following the trajectory set out in part A of Annex X.** Member States may set a lower limit and may distinguish between different types of biofuels, bioliquids and biomass fuels produced from food and feed crops, for instance by setting a lower limit for the

Amendment

For the calculation of a Member State's gross final consumption of energy from renewable energy sources, the contribution from biofuels and bioliquids, as well as from biomass fuels consumed in transport, if produced from food or feed crops, shall be no more than **the contribution from those to the gross** final consumption of energy **from renewable energy sources in 2017 in that Member State, with a maximum of 7 % of gross final consumption** in road and rail transport. **The contribution from biofuels and bioliquids produced from palm oil shall be 0 % from 2021.** Member States may set a lower limit and may distinguish between
