

CHAPTER V

CONCLUSIONS AND SUGGESTIONS

Based on the research findings and discussion, in this chapter the researcher will provide conclusions and suggestions from the research results. Following are the conclusions from the findings and discussion:

5.1 Conclusions

Based on the result of the study can be drawn conclusion that students in listening English pop songs of 7th grade SMPIT Al-Ibrah is declared good, as well as their vocabulary mastery also declared good. There is a positive correlation between students' in listening English pop songs and vocabulary mastery. Therefore, listening English pop songs support students' vocabulary mastery.

5.2 Suggestions

1. For English Teacher

The teacher should find a way to make the students get used to in listening English pop songs in order to make the students having more vocabulary. Because when students are get used to in listening English pop songs, they are expected to have an interesting media for learning vocabulary and students will easily absorb the explanations from the teacher when explaining English lessons because the vocabulary they get automatically from their habit of listening English pop songs.

2. For Students

The students should be more active by themselves with the media they are interest in order to build their vocabulary mastery. In this occasion listening English pop songs is one of the favourite and authentic media because it can relax their mind and the other word, they still can get a lot of vocabulary because of it.

3. For Other Researcher

The researcher hopes that there will be other researchers with more innovation that discuss about other kinds of language skills in order to provide better information and contribute in education of the readers.
