ABSTRACT

This study aims to analyze the effect of Free Cash Flow, Leverage, and Price Earning Ratio partially on Go Public Companies in Indonesia for the 2015-2017 Period. This research is associative quantitative research. The population in this study are all companies that carry out Repurchase Stock registered in the Go Public period 2015-2016. The number of samples used in this study were 31 companies. The sample selection in this study uses saturated sample techniques. The analysis technique used in this study is multiple linear regression analysis using the SPSS application. The results showed that partially free cash flow had a significant positive effect on stock repurchase in Go Public companies in Indonesia for the period 2015-2017. Partial leverage has a significant negative effect on stock repurchase in Go Public companies in Indonesia for the 2015-2017 period, and the price earnings ratio partially has a positive and insignificant effect on stock repurchase in Go Public companies in Indonesia for the 2015-2017 period.

Keywords; *Free Cash Flow, Leverage, Price Earning Ratio, and Stock Reprchase*
